

Sliding/Locking Wall Panels for overbooked and overworked group rooms

PATENT NO. 6,018,915

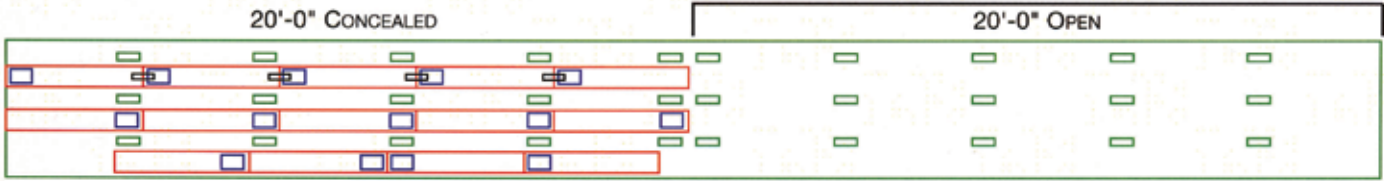

ACOUSTICAL, TACKABLE AND WHITE MARKER BOARDS

Sliding locking panels expand the amount of available wall space, and protect confidential information, making them ideal for areas in which space is limited and group rooms are overbooked.

When confidential information is displayed in an area designated for use by multiple groups and teams, QT Systems allows you to slide blank panels in front of that information, and lock them into place. The next team can now utilize the blank space on those additional panels for their own display, while your confidential information remains safely concealed and out of view.
